

NSS Celebrates 75 Years!

National Cave and Karst Research Institute

National Speleological Society

This weekend AGI Member Organization, the National Speleological Society celebrates its 75th Anniversary in Ely, Nevada at their Annual Meeting. NSS is a leader in promoting: safe and responsible caving practices, effective cave and karst management, the study of speleology and cave conservation. Their website for the meeting covers how Ely, an arid desert, is home to an extensive cave network. They even made a video that covers the history of the organization (it's also a fun watch!). We look forward to catching up with NSS representatives at the Joint Member Society Council Meeting that will take place at GSA, in Denver.
