

## AAG: New AP Course Proposed; New Section Editor Sought

American Association of Geographers

The American Association of Geographers has proposed a new Advanced Placement course in Geographic Information Science and Technology (AP GIS&T) which has been designed to "introduce high school students to the fundamentals of geographic information science and applications of powerful geospatial technologies for spatial analysis and problem solving." Currently 250 attestations from high schools, and 100 colleges and universities are needed to make this a reality.

Additionally, they are seeking applications and nominations for the Environmental Sciences section editor for the *Annals of the American Association of Geographers*.
