

ASCE: Role of Civil Engineers in National Parks

Geo-Institute of the American Society of Civil Engineers

The Executive Director of American Society of Civil Engineers, the parent organization of the Geo-Institute, posted a dispatch from Yellowstone National Park and reflected on the ways civil engineers helped shape it with roads, water systems, and hydroelectric systems among many others. Additionally, ASCE's Report Card for America's Infrastructure highlighted that in recent years over \$12 billion has been deferred from park maintenance.
