## ASBOG: University of Delaware Offering Fundamentals of Geology (FG) Exam

National Association of State Boards of Geology

The National Association of State Boards of Geology (ASBOG) announced that the University of Delaware (UD) will provide graduating seniors the opportunity to take the ASBOG Fundamentals of Geology (FG) Exam starting in 2017. While the UD will pay the expenses related to the Exam and exam proctoring fees, the student will only be required to cover the State of Delaware FG Exam application fee. Successful passing of the FG will enable the students to be a step closer to achieving licensure in 31 States as they begin their careers while providing the UD a valuable assessment of their curriculum in the geosciences.<http://goo.gl/g3VNpa>.
