

SEG: Rare Earth and Critical Elements in Ore Deposits

Society of Economic Geologists

The Society of Economic Geologists has announced the publication of *Reviews in Economic Geology: Rare Earth and Critical Elements in Ore Deposits* vol. 18 edited by Philip L. Verplanck and Murray W. Hitzman. This publication covers "This important volume brings the explorationist up to date on our knowledge of lithium, uranium, yttrium, and other rare earth and critical elements. Descriptions of major deposits and deposit types, exploration guides, and case studies are global in their reach, making this a must-have resource on a group of elements receiving unprecedented interest in the mining industry."
