CanGeoRef Launches, Bringing Focus to Canada-Related Geoscience Research

The American Geological Institute (AGI) and the Canadian Federation of Earth Sciences (CFES) are pleased to announce the launch of CanGeoRef on September 15, 2011. CanGeoRef (www.cangeoref.org) is a bibliographic database covering the Canadian geoscience literature since the early 1800's. CanGeoRef is the result of a cooperative arrangement between CFES and AGI with the intent to expand GeoRef access for smaller companies and individuals focused on Canadian geoscience.
