## EEGS' FastTIMES September Issue

Cover of the EEGS September Issues of FastTIMES

The Environmental and Engineering Geophysical Society (EEGS) have published the September Issue of FastTIMES. This issue centered around a central theme of karst geophysics. It includes six articles on the topic and one book review. FastTIMES is available for free download from the EEGS website. Additionally, this issue includes meeting information for this year's Symposium on the Application of Geophysics to Engineering and Environmental Problems (SAGEEP) meeting which will be co-located with the National Ground Water Association's meeting in Denver, CO.
