

## K-5 Resources

**Welcome to K-5 Resources, a professional development and resource website for Earth science teachers!**

If you are involved in elementary science education in any way, these webpages are for you. We have a rich store of **content**, **activities**, **services** and **links** for you to explore. We encourage you to come back often to tell us what you think about the resources and to suggest more. The K-5 GeoSource website has many pages to explore, including:

Use the links on the left to navigate the major sections of the site. Join the adventure of exploring Earth science through K-5 GeoSource. Contact us at [education@americangeosciences.org](mailto:education@americangeosciences.org) to tell us what you think.

### Explore Content

Answer your "how" and "why" questions about earthquakes, volcanoes, hurricanes, and other Earth science topics.

### Activities

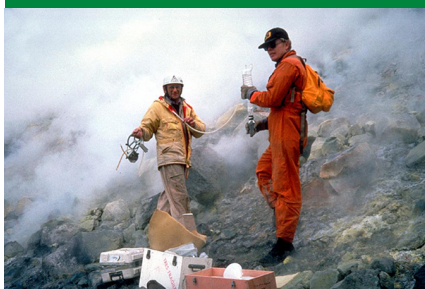

Search a wide variety of investigations, literacy strategies, and science fair projects.

### Assessments

Find the tools to evaluate student learning and tailor instruction to meet your students' identified needs.

## Careers

Gather information and vignettes describing the many exciting career opportunities available to your students in the Earth sciences.

## Education Resources

Search for curriculum, media, outreach programs, professional development resources, teaching ancillaries and much more from across the Earth science.

## Professional Resources

Search for professional development opportunities for Earth science educators and understand more about how children learn science.
