AGI Announces the Publication of Dawn of the Anthropocene: Humanity's Defining Moment

We have entered an era of stark realization. Although Earth's resources once seemed abundant and resilient, we have come to understand the limitations of a planet as small and crowded as our own. In DAWN OF THE ANTHROPOCENE: Humanity's Defining Moment, author George A. Seielstad explores the challenges associated with building a sustainable future in a world struggling to meet society's needs.
