

Workforce Reports

Status of the Geoscience Workforce 2018

The definitive report about the geoscience workforce prepared by AGI. This report examines all aspects of

workforce, from the K-12 environment through university education, industry activities, and economic metrics. Compiled from a myriad of sources, including primary data collected by AGI and from the US Government, companies, and professional societies. More information and table of contents.

Status of Recent Geoscience Graduates 2016

- Purchase a printed version from amazon.com (\$15.00)
- Full sankey diagram from the 2016 report

Status of the Geoscience Workforce 2016

The definitive report about the geoscience workforce prepared by AGI. This report examines all

aspects of workforce, from the K-12 environment through university education, industry activities, and economic metrics. Compiled from a myriad of sources, including primary data collected by AGI and from the US Government, companies, and professional societies. More information and table of contents.

- Purchase and download the PDF now (\$10.00)
- Purchase the print version from Amazon.com (list price \$30.00)

Status of Recent Geoscience Graduates 2015

An overview analysis of the demographics, activities, experiences, and future plans of geoscience graduates with their bachelor's, master's and doctoral degrees in the 2014-2015 academic year.

-  Status of Recent Geoscience Graduates 2015
- Purchase a printed version (\$15.00)

Geoscience Career Master's Preparation Survey Report

This report was generated from data collected from non-PhD preparatory Master's programs in the geosciences. It provides a snapshot of emerging trends regarding students' experiences in their programs, their career interests and goals, and students' preparation in technical geoscience competencies and non-technical competencies. Furthermore, this report compares students' preparation with what competencies non-academic geoscience professionals indicate as most or least important to their own careers.
