Errata and Corrections: 2013 Status of Recent Geoscience Graduates Report

Alexandria, VA – Readers are advised to download the newly corrected version of the 2013 Status of Recent Geoscience Graduates report. An error was found in the title and x-axis labels on the figure on page 20. The data in the figure displays geoscience graduates that are seeking, or have accepted, a job position outside of the geosciences. The associated text has been changed now correctly represents the data presented. The corrected report can be downloaded at: <http://bit.ly/GzvfVtM> or <http://www.agiweb.org/workforce/reports.html>.
