Sign up now for Appalachian Geoscience GeoCamp!

The United States Geological Survey and the West Virginia Geological & Economic Survey have teamed up with West Virginia University to initiate the Appalachian Geoscience GeoCamp this summer. Students will explore concepts and skills related to the earth sciences, including orienteering, topographic and geologic mapping, forest ecology and more. The GeoCamp experience will go far beyond indoor lessons and lectures by putting learning into the field alongside experts, to create hands-on experiences that allow students to explore possible future interests and careers.
