Support a GIS AP Course

American Association of Geographers

Image not found or type unknown
AAG Logo

The American Association of Geographers (AAG) is still seeking support from U.S. High Schools and Universities to establish an Advanced Placement course in Geographic Information Science and Technology (AP GIS&T). While there is a letter of support, AAG is seeking attestations from university programs, but also for those university programs to work with their local high school programs to register their interest in an AP GIS&T course.
