Earthscope Offering Up to \$10,000 through AGeS Program - Deadline to Apply Feb. 8

EarthScope is seeking applications from graduate students to collect and interpret geochronology data that contribute to EarthScope science targets through visits to participating geochronology labs. This is run through its AGeS (Awards for Geochronology Student Research) program which is a multi-year educational initiative aimed at enhancing interdisciplinary, innovative, and high-impact science by promoting training and new interactions between students, scientists, and geochronology labs at different institutions. Applications are due by February 8, 2017.
