Professional development opportunity! Flooding webinar tomorrow #CIWebinar

 not found or type unknown

Join hundreds of attendees from around the world for an in-depth discussion on assessing, mitigating, and communicating flood risk tomorrow, Wednesday, February 8, 2017 at 1:00pm EST. Register here. More info below.

This webinar features experts from federal and state government, who will discuss recent and ongoing activities co-ordinated at national and local levels to assess, mitigate, and communicate flood risk.

Speakers:

- Marie Peppler, Flood Inundation Mapping Coordinator, U.S. Geological Survey
- Maria Cox Lamm, CFM, State Coordinator, Flood Mitigation Program, South Carolina Department of Natural Resources
- Iain Hyde, CFM, Deputy Director, Colorado Resiliency & Recovery Office

We would like to recognize our webinar co-sponsors, the American Association of Geographers, the American Institute of Professional Geologists, the American Meteorological Society, the Association of State Floodplain Managers, the Federal Emergency Management Agency, the U.S. National Chapter of the International Association of Hydrogeologists, the National Oceanic and Atmospheric Administration, the Natural Hazard Mitigation Association, and the U.S. Geological Survey.

Certified Floodplain Managers (CFMs) who participate in the entire live webinar will earn 1 CEC from the Association of State Floodplain Managers.
