

Geo-Risk 2017: Geotechnical Risk from Theory to Practice

Geo-Institute of the American Society of Civil Engineers

The Geo-Institute of the American Society of Civil Engineers announced the next Geo-Risk conference will be held in Denver, Colorado in June. The theme of Geo-Risk 2017 is “Geotechnical Risk from Theory to Practice” and will feature the latest research advances and engineering-practice innovations with a focus on the use of probabilistic and risk methodologies in geotechnical engineering. The conference will include a wide range of knowledge-enhancing technical sessions, short courses, and software demonstrations.
