Corina Cerovski-Darriau

Corina Cerovski-Darriau just graduated from University of California, Berkeley with a BA in geology and a minor in Peace and Conflict Studies. She was recently sponsored by the Geological Society of America to attend UNESCO's International Year of the Planet Earth as the US Student Representative. She was selected based on her essay about minimizing the risk/maximizing the awareness of natural hazards. Corina enjoys working as a liaison between the sciences and public policy and feels it is a nice combination of her interests. She also looks forward to touring the nation's capital, experiencing thunderstorms and fireflies, and hopefully seeing a little geology

Publications while at AGI:

Cerovski-Darriau, C. Looking Forward in the Domestic Drilling Debate: What Direction Should Policy Take on Offshore Drilling. *The Professional Geologist*, Nov/Dec 2008

Cerovski-Darriau, C. Science and Policy: An Intern's View. *Geological Society of America*.

<http://www.geosociety.org/geopolicy/news/0809agi-Intern.htm>

Corina was the policy associate at AGI-GAP and is now working toward an advanced geology degree at University of Oregon.
