Earth Science Week at NSTA 2017 Conference #NSTA17

You're invited to visit the organizers of Earth Science Week in the Exhibit Hall of the National Science Teachers Association (NSTA) Conference later this month in Los Angeles! We'll have materials and demonstrations dealing with Earth Science Week as well as information about additional curriculum, training, and other products and services available from the American Geosciences Institute.

The NSTA conference expo takes place at the Los Angeles Convention Center on March 30-April 2, 2017. Please stop by our booth for activities, resources, and information from AGI and our Earth Science Week partners.
