

Society of Exploration Geophysicists releases statement on March for Science

Society of Exploration Geophysicists

The Society of Exploration Geophysicists (SEG) released a statement yesterday about the March for Science. In the statement, SEG President Bill Abriel notes that many SEG members are "sympathetic to the concept of this event and, like me, will participate as individuals." However, SEG will not be partnering with the March organization, he explains, because "it has the appearance of mixing science and political agendas." Read the full statement on the SEG website.
