"Wolverine" and Zn-rich Volcanic Massive Sulfide Lecture Tour Wraps up in Canada

Geological Association of Canada

Sulfide Minerals from Rapid Creek, Dawson Mining District, Yukon Territory, Canada

The Geological Association of Canada (GAC) hosts a roadshow each year for their Hutchison Medal Winner. The 2016 awardee, Stephen Piercy, toured the entirety of Canada to share his work on volcanic massive sulfide (VMS) deposits. Over the course of the tour he gave 12 lectures, and traveled by trains, planes and automobiles to share his work in the geosciences with his country. Read his full article in the Spring/Printemps edition of *Geology*.
