## International Raw Minerals Observatory to Launch November 2017 #DiscoverINTRAW

Save the Date! The International Raw Minerals Observatory is set to launch in November 2017. This is a new non-profit observatory based on the work of the INTRAW project that will facilitate exchange of best practices in raw materials on a global stage. During 7 weeks, the INTRAW explored five mining industries to explore best practices to build strong mining industry. The campaign, called #DiscoverINTRAW, took participants to Australia, Canada, South Africa, Japan and the USA and focused on three man topics: Trade and Industry, Research and Innovation, Education and Outreach, each of them being based on the projects operational reports.
