New #Mining Children's Book from SME #STEM

Society for Mining, Metallurgy & Exploration

Fresh from the Move Mining Competition earlier this year, Jules and Ryan Miles, who pitched a children's book as a way to transform the face of mining in society, completed the work and had it published. *The Mineral Maniacs and the Magic Hardhat* is now available through the Society for Mining and Metallurgy Exploration Inc. (SME) bookstore and is filled with 150 pages of adventure and "the magical hardhat leads the fifth graders on the most important mission of their lives. A mystery rock or mineral is about to be stolen, and it's up to the maniacs to use their unique gifts to figure out the identity of the mineral before it's taken from the world forever." The book is available for \$10.00 to SME members, and \$12.95 for non-members.
