

## Investigation 1: Gathering Evidence and Modeling

### This investigation will help you to:

- Learn more about models.

To learn more about models, visit the following web sites:

#### Paper Models, **USGS The Learning Web**

The site includes over a dozen reports that are three-dimensional, cut-and-paste paper models illustrating geologic processes and other geologic phenomena. Both paper copies and electronic diskette versions are available

#### Mathematics of Cartography, **Rice University**

Learn how mathematical models are used in the practice of map making.
