EarthScope's Transportable Array now spans Alaska, the last frontier

via NSF:

Seismic station A19K, it's called, and it's now at the edge of an abandoned airstrip far above the Arctic Circle. The nearest population center is 127 miles northeast in Utqia?vik (formerly known as Barrow), the northernmost city in the United States. What a way to celebrate Earth Science Week, Oct. 8-14, 2017.
