AGI Launches Education GeoSource – an Expanded Collection of Earth Science Teaching Resources

FOR IMMEDIATE RELEASE

September 25, 2018

ALEXANDRIA, Va. – What's new for science educators and students heading back to school this fall? The American Geosciences Institute (AGI) is excited to launch Education GeoSource, the most comprehensive collection of Earth science educational resources available online.

Unveiled just in time to help teachers prepare for Earth Science Week (October 14-20, 2018), Education GeoSource provides Earth science educational activities, curricula, teacher professional development, education standards, virtual field trips, videos and animations, assessment materials, funding opportunities, award information, organization contacts, and additional resources.

Education GeoSource (formerly the Education Resources Network) now boasts enhanced functionality, offers more than 3,500 resources, and is growing week by week. The website makes it easier than ever to find what you're seeking, for example, allowing users to search for activities by a given standard of the Next Generation Science Standards.

A major feature of AGI's Center for Geoscience & Society, the website's free geoscience education resources, curated from a variety of sources, are available with the click of a mouse or the tap of a finger. Join the up to 4,000 visitors a month who come to Education GeoSource to find useful resources.

To visit Education GeoSource, simply go to <https://egs.americangeosciences.org>. Find the geoscience education resources you're seeking, review our collections, suggest additional resources, and help us strengthen the collection!

About AGI

The American Geosciences Institute (AGI) is a nonprofit federation of 52 scientific and professional associations that represents more than 260,000 geoscientists. Founded in 1948, AGI provides information services to geoscientists, serves as a voice of shared interests in the profession, plays a major role in strengthening geoscience education, and strives to increase public awareness of the vital role the geosciences play in society's use of resources, resiliency to natural hazards, and interaction with the environment.

AGI is a not-for-profit 501(c)(3) organization dedicated to serving the geoscience community and addressing the needs of society. AGI headquarters are in Alexandria, Virginia.

The American Geosciences Institute represents and serves the geoscience community by providing collaborative leadership and information to connect Earth, science, and people.
