Register for the Upcoming GOLI Webinar on Well Re-Development and Maintenance

October 1, 2018

The American Geosciences Institute (AGI) and the American Institute of Professional Geologists (AIPG) are pleased to announce the next Geoscience Online Learning Initiative (GOLI) webinar: "Techniques for Well Re-Development and Maintenance."

There is no magic method to clean a well. There are many techniques, some that have been used for decades, others are fairly recent. The objective of the re-development is to return the well to its condition when it was installed. We introduced the term Specific Capacity in an earlier session. We will demonstrate why measuring the Specific Capacity of your well is so important.

This 1-hour 20-minute webinar will take place on October 18th, 2018 at 1:00 PM EDT. Participants will earn 0.13 Continuing Education Units (CEUs) through AIPG for attending the event.

The webinar will feature Raymond Talkington, Ph.D., P.G., C.P.G., Principal Hydrogeologist and President, GEOSPHERE Environmental Management, Inc., J. Theodore Morine, P.G., C.P.G., Senior Hydrogeologist and Vice President, Denis L. Maher Company, and Frank Getchell, P.G., C.P.G., Senior Supervising Hydrogeologist, WSP USA.

Please click [here](#) for more information about the webinar. You can register for the webinar [here](#). Please contact AGI's Workforce Development Specialist Heather Houlton (hrh@americangeosciences.org) with any questions about AGI's GOLI offerings.

Don't forget to register for the last webinar in this series:

- November 15th, 1:00 PM EDT (AIPG CPG/EuroGeol Member rate \$65.00; CPG/EuroGeol group rate \$320.00):
Well Re-Development Permitting Considerations and Costs
-
