Geoscience In Your State Information Resources

Case Studies & Factsheets
Our portfolio of case studies written by geoscientists for decision makers. Our case studies provide specific examples of how research in the geosciences can be applied to the decision-making process. Our factsheets provide short, clearly written, and scientifically rigorous introductions to a range of topics, and suggest additional free resources for further exploration. AGI staff and an external review team work with the authors to ensure that all case studies are written and presented in a format and style that meets the needs and expectations of decision makers.

Maps & Visualizations
Peruse our collection of maps and visualizations that has been curated from federal and state agencies, including state geological surveys. We provide coverage of all 50 states, and the District of Columbia. The focus of our maps and visualizations collection is on interactive maps and visualization tools.
Webinars
Watch webinars on a variety of topics that bring geoscientists and decision makers together to discuss potential solutions to challenges at the interface of geoscience and society.

State & Local Agencies
Browse an extensive list of state, and local agencies, and other organizations that work on geoscience issues.
