Geoscience In Your State

Discover state-specific geoscience information that is decision-relevant and rich with links to credible and impartial sources

Delve into a variety of information resources to learn about how geoscience is being applied in your state in five main topical areas: climate, water, minerals, energy and hazards.

Choose your state from the list below to learn more.

Alabama

Alaska

Arizona

Arkansas

California

Colorado

Connecticut

Delaware

Florida

Georgia

Hawaii

Idaho

Illinois

Indiana

Iowa

Kansas

Kentucky

Louisiana

Maine

Maryland

Massachusetts

North Carolina
North Dakota
Ohio
Oklahoma
Oregon
Pennsylvania
Rhode Island
South Carolina

South Dakota
Tennessee
Texas
Utah
Vermont
Virginia
Washington
West Virginia
Wisconsin
Wyoming

Geoscience In Your State Information Resources

Case Studies & Factsheets

Our portfolio of case studies written by geoscientists for decision makers. Our case studies provide specific examples of how research in the geosciences can be applied to the decision-making process. Our factsheets provide short, clearly written, and scientifically rigorous introductions to a range of topics, and suggest additional free resources for further exploration. AGI staff and an external review team work with the authors to ensure that all case studies are written and presented in a format and style that meets the needs and expectations of decision makers.

Maps & Visualizations

Peruse our collection of maps and visualizations that has been curated from federal and state agencies, including state geological surveys. We provide coverage of all 50 states, and the District of Columbia. The focus of our maps and visualizations collection is on interactive maps and visualization tools.
