Agencies Working on Geoscience Issues in Maryland

Maryland Department of Natural Resources
https://dnr.maryland.gov/Pages/default.aspx
The Department of Natural Resources leads Maryland in securing a sustainable future for our environment, society, and economy by preserving, protecting, restoring, and enhancing the State’s natural resources.

Maryland Department of the Environment
https://mde.maryland.gov/Pages/index.aspx
The mission of the Maryland Department of the Environment is to protect and restore the environment for the health and well-being of all Marylanders.

Maryland Emergency Management Agency
https://mema.maryland.gov/Pages/default.aspx
The mission of the Maryland Emergency Management Agency is to ensure that Maryland families, communities, and key stakeholders are provided the tools they need to prepare for, mitigate against, respond to, and recover from the consequences of emergency and disaster events.

Maryland Geological Survey
http://www.mgs.md.gov/
The Maryland Geological Survey's mission is primarily scientific-investigative, with authorization to conduct topographic, geologic, hydrographic, and geophysical surveys; to prepare topographic, geologic, and other types of maps to meet specific needs; to prepare reports on the extent and character of the geology, minerals, and water resources of the State; and to engage in, sponsor, and coordinate archeological research in Maryland.

Case Studies & Factsheets
Although sinkhole development in susceptible areas cannot be completely prevented, policy makers and the public can use geologic maps that delineate karst features to develop strategies that can minimize or avoid property damage and personal injuries. Defining the Problem Sinkholes, which abound in...
