Geoscience in Your State: Maryland
By the numbers: Maryland

- 8,416 geoscience employees (excludes self-employed)
- 295 million gallons/day: total groundwater withdrawal
$379 million: value of nonfuel mineral production in 2017
32 total disaster declarations, including 9 flood, 8 hurricane, and 7 snow disasters (1953-2017)
$204 million: NSF GEO grants awarded in 2017

Agencies Working on Geoscience Issues in Maryland

**Maryland Department of Natural Resources**
https://dnr.maryland.gov/Pages/default.aspx
The Department of Natural Resources leads Maryland in securing a sustainable future for our environment, society, and economy by preserving, protecting, restoring, and enhancing the State’s natural resources.

**Maryland Department of the Environment**
https://mde.maryland.gov/Pages/index.aspx
The mission of the Maryland Department of the Environment is to protect and restore the environment for the health and well-being of all Marylanders.

**Maryland Emergency Management Agency**
https://mema.maryland.gov/Pages/default.aspx
The mission of the Maryland Emergency Management Agency is to ensure that Maryland families, communities, and key stakeholders are provided the tools they need to prepare for, mitigate against, respond to, and recover from the consequences of emergency and disaster events.

**Maryland Geological Survey**
http://www.mgs.md.gov/
The Maryland Geological Survey's mission is primarily scientific-investigative, with authorization to conduct topographic, geologic, hydrographic, and geophysical surveys; to prepare topographic, geologic, and other types of maps to meet specific needs; to prepare reports on the extent and character of the geology, minerals, and water resources of the State; and to engage in, sponsor, and coordinate archeological research in Maryland.

Case Studies & Factsheets
Geologic map depicts sinkhole susceptibility in Maryland
Although sinkhole development in susceptible areas cannot be completely prevented, policy makers and the public can use geologic maps that delineate karst features to develop strategies that can minimize or avoid property damage and personal injuries. Defining the Problem Sinkholes, which abound in...

Webinars & Forums

Offshore Energy
This webinar is based on a Congressional briefing organized by the Advances in Earth Science coalition (16 May 2016). The webinar brings together experts from academia and government to explain the scientific and engineering tools that enable production in challenging environments far from land...

GOLI Online Courses

Water as One Resource
Course Type: GOLI Online Course
View course
This course provides an overview of how groundwater and surface water interact, what the implications of these interactions on water resources are, and how water can be more effectively managed if an understanding of these interactions is incorporated. The course presenters are Ken...
