Geoscience in Your State: New Jersey
By the numbers: New Jersey

- 8,387 geoscience employees (excludes self-employed)
- 569 million gallons/day: total groundwater withdrawal
$265 million: value of nonfuel mineral production in 2017
50 total disaster declarations, including 17 severe storm, 9 hurricane, and 8 flood disasters (1953-2017)?
$15.3 million: NSF GEO grants awarded in 2017...

Agencies Working on Geoscience Issues in New Jersey

New Jersey Department of Environmental Protection
https://www.nj.gov/dep/
On America's first official '"Earth Day"' — April 22, 1970, the New Jersey Department of Environmental Protection was born. New Jersey became the third state in the country to consolidate its past programs into a unified major agency to administer aggressive environmental protection and conservation efforts. Former Governor William T. Cahill appointed Richard J. Sullivan as the first commissioner. Since that day, NJDEP began a role to manage natural resources and solve pollution problems. In what started with about 1,400 employees in five divisions, NJDEP now has a staff of approximately 2,900 and is a leader in the country for its pollution prevention efforts and innovative environmental management strategies.

New Jersey Geological Survey
https://www.state.nj.us/dep/njgs/index.html
The mission of the New Jersey Geological Survey includes geoscience mapping, research and interpretive roles as well as water resource planning and regulatory functions.

New Jersey Office of Emergency Management
http://www.ready.nj.gov/
The Emergency Management section is responsible for planning, directing and coordinating emergency operations within the State of New Jersey which are beyond local control.

Case Studies & Factsheets
Dry well usage across the United States

Introduction Dry wells improve stormwater drainage and aquifer recharge by providing a fast, direct route for rainwater to drain deep into underlying sediment and rock. Dry wells are most common in the western U.S. where clay or caliche layers slow down the natural drainage of water into underlying...

Webinars & Forums

Offshore Energy
This webinar is based on a Congressional briefing organized by the Advances in Earth Science coalition (16 May 2016). The webinar brings together experts from academia and government to explain the scientific and engineering tools that enable production in challenging environments far from land...
