 North Carolina Division of Soil & Water Conservation
https://www.ncagr.gov/SWC/index.html
The Division of Soil & Water Conservation, under the North Carolina Department of Agriculture & Consumer Services, provides programs, technical services and educational outreach promoting voluntary natural resource management and conservation on the private lands of NC through a non-regulatory, incentive-driven approach. The Division cooperates with federal, state and local partners to administer a comprehensive statewide program to protect and conserve the state's soil and water resources.

 North Carolina Emergency Management
https://www.ncdps.gov/ncem
North Carolina Emergency Management works to enhance the state’s resiliency by actively collaborating, communicating and coordinating to prevent, mitigate, respond to and recover from disasters.

 North Carolina Geographic Information Coordinating Council
https://it.nc.gov/about/boards-commissions/north-carolina-geographic-information…
The North Carolina Geographic Information Coordinating Council (GICC) was established by the NC General Assembly to develop policies regarding the use of geographic information, geographic information systems (GIS), and related technologies.

 North Carolina Geological Survey
https://deq.nc.gov/about/divisions/energy-mineral-land-resources/north-carolina-…
The mission of the North Carolina Geological Survey is to provide unbiased and technically accurate applied earth science information to address societal needs. This includes geologic maps, mineral resource and geochemical information, topographic maps and digital products, and earth science education initiatives. The agency examines, surveys and maps the geology, mineral resources and topography of the state, while encouraging the wise conservation and use of geologic resources by industry, commerce, agriculture and government for the general welfare of the citizens of North Carolina.

Ocean Acidification Impacts on Fisheries
Course Type: GOLI Online Course
View course
As the amount of atmospheric carbon dioxide has increased over recent history, so has the acidity of oceans worldwide. The changing acidity of the ocean has many ecological and economic impacts, one of the most serious being its effects on marine life and fisheries. The impact of ocean...
