Geoscience in Your State: North Carolina
By the numbers: North Carolina

- 11,529 geoscience employees (excludes self-employed)
- 520 million gallons/day: total groundwater withdrawal
$1.11 billion: value of nonfuel mineral production in 2017

59 total disaster declarations, including 25 hurricane, 8 flood, and 8 severe snow disasters (1953-2017)

$11.2 million: NSF GEO grants awarded in...

**Agencies Working on Geoscience Issues in North Carolina**

**North Carolina Department of Environmental Quality**  
https://deq.nc.gov/  

**North Carolina Division of Soil & Water Conservation**  
https://www.ncagr.gov/SWC/index.html  
The Division of Soil & Water Conservation, under the North Carolina Department of Agriculture & Consumer Services, provides programs, technical services and educational outreach promoting voluntary natural resource management and conservation on the private lands of NC through a non-regulatory, incentive-driven approach. The Division cooperates with federal, state and local partners to administer a comprehensive statewide program to protect and conserve the state's soil and water resources.

**North Carolina Emergency Management**  
https://www.ncdps.gov/ncem  
North Carolina Emergency Management works to enhance the state’s resiliency by actively collaborating, communicating and coordinating to prevent, mitigate, respond to and recover from disasters.

**North Carolina Geographic Information Coordinating Council**  
https://it.nc.gov/about/boards-commissions/north-carolina-geographic-information-…  
The North Carolina Geographic Information Coordinating Council (GICC) was established by the NC General Assembly to develop policies regarding the use of geographic information, geographic information systems (GIS), and related technologies.

**North Carolina Geological Survey**  
https://deq.nc.gov/about/divisions/energy-mineral-land-resources/north-carolina-…  
The mission of the North Carolina Geological Survey is to provide unbiased and technically accurate applied earth science information to address societal needs. This includes geologic maps, mineral resource and geochemical information, topographic maps and digital products, and earth science education initiatives. The agency examines, surveys and maps the geology, mineral resources and topography of the state, while encouraging the wise conservation and use of geologic resources by industry, commerce, agriculture and government for the general welfare of the citizens of North Carolina.

**Maps & Visualizations**

Interactive map of offshore sand and gravel resources of the United States  
Bureau of Ocean Energy Management

The Bureau of Ocean Energy Management's Marine Minerals Information System (MMIS) provides an interactive map with information on offshore sand and gravel resources for 18 states on the Atlantic and Gulf coasts of the United States. The system includes: Sand and gravel resources Marine...

Offshore Energy
This webinar is based on a Congressional briefing organized by the Advances in Earth Science coalition (16 May 2016). The webinar brings together experts from academia and government to explain the scientific and engineering tools that enable production in challenging environments far from land...
