

## Geoscience in Your State: South Carolina

**WHAT IS GEOSCIENCE?**

Geoscience is the study of Earth and the composition, structure, processes, and physical processes that control it and the energy, information, materials and resources that are available to us. Geoscientists study the development and evolution of our planet, environmental health, and help to improve our quality of life.

**By the numbers SOUTH CAROLINA**

- ▶ 3,054 geoscience employees (excludes self-employed)<sup>1</sup>
- ▶ 365 million gallons/day: total groundwater withdrawal<sup>3</sup>
- ▶ 38 million acres of undeveloped/parkland in SC<sup>2</sup>
- ▶ 170 million acres of forestland in SC (17.1 million acres in the Southeast)
- ▶ 152 million acres of cropland in SC<sup>2</sup>

**DEVELOPMENT AND CONSTRUCTION**

- ▶ 38 million acres of undeveloped/parkland in SC

- ▶ 170 million acres of forestland in SC (17.1 million acres in the Southeast)

**INDUSTRY AND AGRICULTURE**

- ▶ 3,054 geoscience employees (excludes self-employed)<sup>1</sup>
- ▶ 365 million gallons/day: total groundwater withdrawal<sup>3</sup>
- ▶ 38 million acres of undeveloped/parkland in SC
- ▶ 170 million acres of forestland in SC (17.1 million acres in the Southeast)
- ▶ 152 million acres of cropland in SC<sup>2</sup>

**WATER RESOURCES**

- ▶ 365 million gallons/day: total groundwater withdrawal<sup>3</sup>
- ▶ 38 million acres of undeveloped/parkland in SC
- ▶ 170 million acres of forestland in SC (17.1 million acres in the Southeast)
- ▶ 152 million acres of cropland in SC<sup>2</sup>

**LAND AND FOREST RESOURCES**

- ▶ 170 million acres of forestland in SC (17.1 million acres in the Southeast)
- ▶ 152 million acres of cropland in SC<sup>2</sup>

<sup>1</sup> Employment in Geoscience (2015)

### Agencies Working on Geoscience Issues in South Carolina

#### **South Carolina Department of Natural Resources**

<http://www.dnr.sc.gov/>

The SCDNR is to be a trusted and respected leader in natural resources protection and management, by consistently making wise and balanced decisions for the benefit of the state's natural resources and its people.

#### **South Carolina Emergency Management Division**

<https://www.scecmd.org/>

SCEMD's mission is to develop, coordinate, and lead the state emergency management program, enabling effective preparation for, response to and recovery from emergencies and disasters in order to save lives, reduce human suffering and minimize property loss.

#### **South Carolina Geological Survey**

<http://www.dnr.sc.gov/geology/index.htm>

The mission of the Geological Survey of South Carolina is to provide reliable, unbiased scientific information to public and private decision-makers involved with land-use planning, environment, and economic development.

#### **South Carolina State Climatology Office**

<http://www.dnr.sc.gov/climate/sco/index.php>

The South Carolina State Climatology Office strives to acquire, archive, process, and disseminate, in the most cost-effective way possible, all climate and weather information that is or could be of value to public officials, corporations, and private citizens in the state.

## Maps & Visualizations

Interactive map of offshore sand and gravel resources of the United States

Bureau of Ocean Energy Management

The Bureau of Ocean Energy Management's Marine Minerals Information System (MMIS) provides an interactive map with information on offshore sand and gravel resources for 18 states on the Atlantic and Gulf coasts of the United States. The system includes: Sand and gravel resources Marine...

## Case Studies & Factsheets

## Dry well usage across the United States

Introduction Dry wells improve stormwater drainage and aquifer recharge by providing a fast, direct route for rainwater to drain deep into underlying sediment and rock. Dry wells are most common in the western U.S. where clay or caliche layers slow down the natural drainage of water into underlying...
