By the numbers: Oregon

- 4,914 geoscience employees (excludes self-employed)
- 1.48 billion gallons/day: total groundwater withdrawal
- $474 million: value of nonfuel mineral production in 20174
- 73 total disaster declarations, including 40 fire, 14 flood, and 13 severe storm disasters (1953-2017)?
- $143 million: NSF GEO grants awarded in 20174...

Agencies Working on Geoscience Issues in Oregon

**Oregon Department of Energy**  
https://www.oregon.gov/energy/Pages/index.aspx  
ODOE is focused on helping Oregon remain an energy leader and reach the state’s energy and climate goals.

**Oregon Department of Environmental Quality**  
https://www.oregon.gov/deq/Pages/index.aspx  
The Oregon Department of Environmental Quality is a regulatory agency whose job is to protect the quality of Oregon’s environment. DEQ’s mission is to be a leader in restoring, maintaining and enhancing the quality of Oregon’s air, land and water.

**Oregon Department of Geology and Mineral Industries**  
https://www.oregon.gov/dogami/Pages/index.aspx  
DOGAMI’s mission is to provide earth science information and regulation to make Oregon safe and prosperous.

**Oregon Department of State Lands**  
The mission of the Department of State Lands is to ensure a legacy for Oregonians and their public schools through sound stewardship of lands, wetlands, waterways, unclaimed property, estates and the Common School Fund.

**Oregon Office of Emergency Management**  
https://www.oregon.gov/OEM/Pages/default.aspx  
The OEM mission is to lead statewide efforts to develop and enhance preparedness, response, recovery and mitigation capabilities to protect the lives, property and environment of the whole community.

**Oregon Water Resources Department**  
The Department’s mission is to serve the public by practicing and promoting responsible water management through to restoration and protection of streamflows and watersheds in order to ensure the long-term sustainability of Oregon’s ecosystems, economy, and quality of life.

Maps & Visualizations

[Interactive database for geologic maps of the United States](https://www.oregon.gov/energy/Pages/index.aspx)

U.S. Geological Survey

The U.S. Geological Survey hosts the National Geologic Map Database (NGMDB). This interactive tool serves as a national archive for high-quality, standardized geologic maps created by the U.S. Geological Survey and state geological surveys. The MapView section of the NGMDB displays geologic maps...
Dry wells for stormwater management

What is a Dry Well? A dry well is a well that is used to transmit surface water underground and is deeper than its width at the surface (see image, below). Most dry wells are 30 to 70 feet deep and 3 feet wide at the surface. They are lined with perforated casings and can be filled with gravel or...

Ocean Acidification Impacts on Fisheries

This webinar addresses how geoscience helps us to understand ocean acidification, ocean acidification's impacts on marine life, and what states and municipalities can do to reduce the fishery-related economic impacts of ocean acidification.
