Agencies Working on Geoscience Issues in Wyoming

**Wyoming Department of Environmental Quality**
http://deq.wyoming.gov/

The Wyoming Department of Environmental Quality is responsible for enforcing state and federal environmental laws. It is comprised of seven divisions inluding: administration, abandoned mine land, air quality, industrial siting, land quality, solid & hazardous waste, water quality.

**Wyoming State Emergency Response Commission**
https://hls.wyo.gov/
Among the SERC’s duties are the following: designate local emergency planning districts within the state and appoint a local emergency planning committee (LEPC) to serve each of the districts; coordinate and supervise activities of the local committees; review local emergency response plans annually; receive all chemical release notifications and inventory reports.

**Wyoming State Geological Survey**
https://www.wsgs.wyo.gov/
The Wyoming State Geological Survey (WSGS) performs the important and critical function of interpreting Wyoming’s complex geology.

Maps & Visualizations

Interactive database for geologic maps of the United States
U.S. Geological Survey

The U.S. Geological Survey hosts the National Geologic Map Database (NGMDB). This interactive tool serves as a national archive for high-quality, standardized geologic maps created by the U.S. Geological Survey and state geological surveys. The MapView section of the NGMDB displays geologic maps...

GOLI Online Courses

Making Produced Water More Productive
Course Type: GOLI Online Course
View course
Geoscience is essential to our understanding and management of produced water, an inevitable byproduct of oil and gas development. This course provides a scientific and regulatory background of produced water, how it is commonly disposed, what opportunities exist for the re-use of produced water...
