Agencies Working on Geoscience Issues in Wyoming

Wyoming Department of Environmental Quality
http://deq.wyoming.gov/
The Wyoming Department of Environmental Quality is responsible for enforcing state and federal environmental laws. It is comprised of seven divisions including: administration, abandoned mine land, air quality, industrial siting, land quality, solid & hazardous waste, water quality.

Wyoming State Emergency Response Commission
https://hls.wyo.gov/
Among the SERC’s duties are the following: designate local emergency planning districts within the state and appoint a local emergency planning committee (LEPC) to serve each of the districts; coordinate and supervise activities of the local committees; review local emergency response plans annually; receive all chemical release notifications and inventory reports.

Wyoming State Geological Survey
https://www.wsgs.wyo.gov/
The Wyoming State Geological Survey (WSGS) performs the important and critical function of interpreting Wyoming’s complex geology.

Maps & Visualizations

Interactive database for geologic maps of the United States
U.S. Geological Survey
The U.S. Geological Survey hosts the National Geologic Map Database (NGMDB). This interactive tool serves as a national archive for high-quality, standardized geologic maps created by the U.S. Geological Survey and state geological surveys. The MapView section of the NGMDB displays geologic maps...

Webinars & Forums

The 2016 Critical Issues Forum was a 1-½ day meeting covering multiple aspects of groundwater depletion in the High Plains.

GOLI Online Courses

Making Produced Water More Productive
Course Type: GOLI Online Course
View course
Geoscience is essential to our understanding and management of produced water, an inevitable byproduct of oil and gas development. This course provides a scientific and regulatory background of produced water, how it is commonly disposed, what opportunities exist for the re-use of produced water...
