Geoscience in Your State: West Virginia
By the numbers: West Virginia

- 3,217 geoscience employees (excludes self-employed)
- 134 million gallons/day: total groundwater withdrawal
$245 million: value of nonfuel mineral production in 2017

67 total disaster declarations, including 29 flood, 23 severe storm, and 4 snow disasters (1953-2017)

$294,000: NSF GEO grants awarded in 2017

Agencies Working on Geoscience Issues in West Virginia

West Virginia Department of Environmental Protection
http://dep.wv.gov/Pages/default.aspx

The West Virginia Department of Environmental Protection (WVDEP) is a statewide operation, headquartered in Charleston. Operations are accomplished on a district or regional level, based upon the program, thus requiring a workforce throughout West Virginia. The WVDEP is involved in activities related to air quality, environmental quality and remediation, emergency response to hazards, land restoration, mining operations and reclamation, and regulation of the oil and gas industry.

West Virginia Division of Homeland Security & Emergency Management
https://dhsem.wv.gov/Pages/default.aspx

The mission of the West Virginia Division of Homeland Security and Emergency Management (DHSEM) is to ensure the protection of life and property by providing coordination, guidance, support and assistance to local emergency managers and first responders.

West Virginia Geological & Economic Survey
http://www.wvgs.wvnet.edu/

The WVGES was established with the purposes to, in general, (1) investigate the State's geological and physical resources, (2) make the results of these investigations promptly available to the public, and (3) provide topographic, geologic, and other maps of the State.

Maps & Visualizations

Interactive database for geologic maps of the United States

U.S. Geological Survey

The U.S. Geological Survey hosts the National Geologic Map Database (NGMDB). This interactive tool serves as a national archive for high-quality, standardized geologic maps created by the U.S. Geological Survey and state geological surveys. The MapView section of the NGMDB displays geologic maps...

Case Studies & Factsheets
Non-Fuel Products of Oil and Gas

Introduction Oil and natural gas are complex mixtures of chemicals. Oil refineries and gas processing plants extract the organic compounds that make the best fuels for transportation, heating, and electricity generation: gasoline, jet fuel, diesel fuel, heating oil, and methane. Other chemicals...
