## #20: SEG's Emerging Professionals - Johannes Douma

### SEG's Seismic Soundoff

Andrew Geary speaks with Johannes Douma, vice-chair of the Emerging Professionals International Committee (EPIC). Johannes provides the committee's background, current focus, and how emerging professionals can get involved. EPIC is SEG's resource for emerging professionals, those with less than 8 years in the industry. It's a global group sharing a common interest in sponsoring gatherings of emerging geoscientists to discuss and gain further understanding of their respective disciplines. Johannes is an exploration geophysicist at Cimarex Energy and vice-chair of EPIC. At Cimarex, he currently works on the Anadarko Exploration Team focusing on further developing formations in Oklahoma. He completed both his undergraduate and graduate degrees in geophysics at Colorado School of Mines. If you enjoy the show, review us on iTunes – your review helps others find the show. Subscribe to Seismic Soundoff on the podcast app of your choice to receive the latest episodes first. Full show notes at <http://seg.org/podcast>. Sponsor The SEG Wiki is home to hundreds of biographies of key geoscientists, geophysical tutorials, and core content from the science of applied geophysics. Visit <http://wiki.seg.org> to learn how you can grow the world's first online, geophysics encyclopedia.
