## #3: James Gaiser, 2016 DISC lecturer

### SEG's Seismic Soundoff

James Gaiser, SEG's 2016 Distinguished Instructor, joins Andrew Geary to discuss his new book and course, 3C Seismic and VSP: Converted waves and vector wavefield applications. More info at [seg.org/podcast](http://seg.org/podcast). The SEG Distinguished Instructor Short Course (DISC) is an eight-hour, one-day course on a topic of current and widespread interest presented at locations throughout the world. With an emphasis on the unique aspects of vector wavefields, anisotropy, and the important relationships that unify S-waves and P-waves, the 2016 DISC presents an overview of 3C seismic theory and practical application: from fundamentals of PS-waves and vertical seismic profiles, through to acquisition and processing including interpretation techniques. "As a person who has published books, I am awed by the work the author has done to create this seminal publication." Bob A. Hardage Senior Research Scientist, Bureau of Economic Geology, The University of Texas at Austin • To register for the course, visit [seg.org/disc](http://seg.org/disc) • To purchase the book, visit [seg.org/bookmart](http://seg.org/bookmart) If you enjoy the show, show your support and please review Seismic Soundoff on iTunes. It makes a big difference. Sponsor: The SEG Wiki is home to hundreds of biographies of key geoscientists, geophysical tutorials, and core content from the science of applied geophysics. Visit [wiki.seg.org](http://wiki.seg.org) to learn how you can grow the world's first online, geophysics encyclopedia.
