Dr. Donald Siegel Honored as the 2022 Marcus Milling Legendary Geoscientist

ALEXANDRIA, Va. — The American Geosciences Institute (AGI) is pleased to recognize Dr. Donald I. Siegel, Professor Emeritus at the Department of Earth and Environmental Sciences of Syracuse University, with the 2022 Marcus Milling Legendary Geoscientist Medal.

Dr. Siegel is acclaimed for his decades of pioneering work on wetland geochemistry and hydrogeology, his education and mentoring of students and early-career scientists, and his leadership in multiple geoscience professional societies. His wetland research evolved to examine the ways that groundwater flow and water quality influence greenhouse gas emissions in the vast peat lands of northern Canada, Siberia, and northern Minnesota. This research has been recognized as showing potential significance for building understanding of global climate change.

Dr. Siegel has provided society leadership in numerous capacities including as Past President of the Geological Society of America (GSA) and has received many honors in the field of hydrogeology, including the O.E. Meinzer Award, the Birdsall Distinguished Lectureship, and GSA’s Distinguished Service Award. He is a Fellow of the American Association for the Advancement of Science, the American Geophysical Union, and GSA.

"Don Siegel's groundbreaking work as a scientist, his teaching and mentoring of students entering the discipline, and his leadership in professional societies and publications, taken together, represent a tremendous service to the geoscience community," said AGI President Dr. Paul Weimer. "He has not only shaped the field of hydrogeology but provided a model of professional excellence for future geoscientists."

"Don Siegel has been the instigator of great progress in the science of groundwater hydrology and its effects on surface ecology," said Dr. Jeffrey Chanton, Professor at the Department of Earth, Ocean, and Atmospheric Science at Florida State University, in nominating Dr. Siegel for the award. "He has been instrumental to the advancement of science through his many research publications, his education of students, and the support of his colleagues."

"I am flattered to receive the 2022 Marcus Milling Legendary Geoscientist Medal from AGI and thank those who graciously nominated me," Dr. Siegel said. "Throughout my career I did my best to teach and mentor students with compassion and understanding, do research with rigor and a sufficiently open mind to accept when others proved me wrong, and finally, as an administrator, listen and understand opposing views and not just 'hear' them. I thank AGI and feel honored receiving this award."

Dr. Siegel has been invited to accept the medal during the awards ceremony of the American Association of Petroleum Geologists/Society of Exploration Geophysicists annual meeting in Houston, Texas, August 28-September 2, 2022.

The Marcus Milling Legendary Geoscientist Medal is a lifetime achievement award given in recognition of an individual's high-quality basic and applied science achievements in the Earth sciences. The award, established in 1999, was named in late 2006. Dr. Marcus Milling was an ardent and tireless champion of geoscience education, policy, and information services who served as AGI's Executive Director from 1992 until July of 2006, when he transitioned to a Senior Advisor role.
AGI directly, or in cooperation with its Member Societies, bestows a number of awards each year to recognize particular excellence in the geosciences. In addition, AGI works with its Member Societies to foster nominations of deserving geoscientists for consideration in a number of National Science Awards. About AGI
The American Geosciences Institute (AGI), a federation of scientific and professional associations representing over a quarter-million geoscientists, is a nonprofit 501(c)(3) organization dedicated to serving the geoscience community and addressing the needs of society. AGI headquarters are in Alexandria, Virginia.
