Council on #Undergraduate Research Unanimously Approves Code of Ethics #higher #ethics

Council on Undergraduate Research

The Council on Undergraduate Research (CUR) unanimously approved a Code of Ethics statement at its Annual Business Meeting in July. It will serve as guide for students, faculty, and administrators as they pursue undergraduate research, scholarship, and creative activities. The CUR Code of Ethics for Undergraduate Research covers areas such as personal conduct of faculty members and students, organizational and institutional conduct, conflict of interest, and relationship of mentors and mentees.
