

Abstracts due August 15th for "The Sinkhole Conference"

Karst Waters Institute

National Cave and Karst Research Institute

The Multidisciplinary Conference on Sinkholes and the Engineering and Environmental Impacts of Karst, generally called “The Sinkhole Conference,” is the longest-running international conference of its type. Since 1984, engineers, geologists, hydrologists, land managers, biologists, and many others have gathered at these meetings to exchange cutting-edge information on karst and its many benefits and challenges. Abstracts may be submitted until 15 August 2017, after which will be the time to submit your papers to accompany your abstracts. The papers of past Sinkhole Conferences have made those proceedings highly sought and widely cited. We expect the proceedings of the upcoming meeting will be the best yet.

The Sinkhole Conference is managed by the National Cave and Karst Research Institute and this next conference will be jointly organized with the Karst Waters Institute. Additionally, the conference will include the 3rd Appalachian Karst Symposium to make for a truly special event.

The 15th Sinkhole Conference will occur on 2-6 April 2018 at the National Conservation Training Center in Shepherdstown, West Virginia, USA, about a 1.5 hour drive from the Washington, DC area. The conference circular, which is a convenient summary of the conference, is available and downloadable from <http://www.sinkholeconference.com/>, where all other conference details can also be found. To submit your abstracts and for instructions on preparing them, see <http://www.sinkholeconference.com/abstract-and-paper-submissions-notific...>
