

## GeoRef News

The Geoscience Information Society hosted a webinar on May 18, 2022. Sharon Tahirkheli, Director of Scholarly Information at the American Geosciences Institute provided an insightful update on GeoRef. [Click here to watch the webinar.](#)

Our Online Databases list is updated regularly. For further information visit [Online Database Products](#) here.

Check out our newest complimentary **Midwest Geological Sequestration Consortium Research Publications Database** on our Online Database list. For more information visit <https://carbon.americangeosciences.org/vufind/>.

The GeoRef Preview Database is updated weekly!

164,683 references to recent publications were loaded in our most recent update.

Day passes now available for **AusGeoRef**, **CanGeoRef** and the **Groundwater and Soil Contamination** database. A pass that allows unlimited searching of each database is available for the low cost of \$12.00. [Click here to sign up.](#)

### **Geoscience Theses and Dissertations in GeoRef**

It is that time of the year when we request information on Master's and Bachelor's theses and Doctoral dissertations for the 2020-2021 time period. We are interested in receiving information in the geoscience disciplines including soils, hydrogeology, marine geology, and environmental geology so that references to these documents can be included in GeoRef, the primary bibliographic service for the geosciences used by thousands of researchers worldwide. Visit [GeoRef database](#) for more information.

In addition to being referenced in GeoRef, information on recent theses and dissertations is linked to AGI's popular publication the [Directory of Geoscience Department](#).

When submitting information directly, please include as much information as possible: title, author, date of publication, degree, total number of pages, number of references in bibliography, details on fold-out maps, illustrations, etc. If your theses or dissertations are available via the internet, please send us information on how we might access them – e.g. through ProQuest, your online library catalog, a department web site, in an electronic repository, etc. If they are available through an electronic repository that is not open to outside visitors, please consider sending us as much information as is possible directly. If they are available through your catalog, please send us advice on how to locate the theses and dissertations for the relevant departments.

Send an email to [ml@americangeosciences.org](mailto:ml@americangeosciences.org) to submit them or if you have any questions.

**GeoRef** now contains more than **4 million** references to the world's geoscience literature. On July 11, 2018 GeoRef staff passed the 4 million reference mark. Since its development in the late 1960's, the database has grown steadily – reaching its first million record in 1982. With the acceleration of scientific publishing, the last million records were added over a span of only 9 years. For a short audio clip [click here: https://www.americangeosciences.org/geotimes/geotimes-community-post-233...](https://www.americangeosciences.org/geotimes/geotimes-community-post-233...)

Visit Open-Access Journals/Series for the complete list of Open-Access Series covered in GeoRef. Recent additions in June include:

Geochemistry, Geophysics, Geosystems - G<sup>3</sup>. eISSN 1525-2027.

Geologica Macedonica. ISSN 0352-1206. eISSN 1857-8586.

Energies. eISSN 1996-1073.

Geohealth. eISSN 2471-1403.

GeoPatterns. eISSN 2501-7837.

Open Life Sciences. eISSN 2391-5412.

Present Environment and Sustainable Development. ISSN 1843-5971. eISSN 2284-7820.

Science and Technology of Advanced Materials. ISSN 1468-6996. eISSN 1878-5514.

Soil Science Annual. ISSN 2300-4967. eISSN 2300-4975.
