

Understanding Your Environment: Bedrock Geology and Your Community

Students are challenged to produce a brochure for their local Bed and Breakfast Association that educates the public about the geologic history of their community.

Students Will...

- Understand how sedimentary, igneous, and metamorphic rocks are formed.
 - Understand how and why bedrock geology fits in with the rest of the Earth systems.
 - Participate in scientific inquiry and construct logical conclusions based on evidence.
 - Describe how the principles of Earth science relate to geologic change.
-
