

## American Association of Petroleum Geologists

Since its founding in 1917, the American Association of Petroleum Geologists has been a pillar of the world-wide scientific community. The original purpose of AAPG, to foster scientific research, to advance the science of geology, to promote technology, and to inspire high professional conduct, still guides the Association today.

Currently the world's largest professional geological society with over 30,000 members, AAPG provides publications, conferences, and educational opportunities to geoscientists and disseminates the most current geological information available to the general public.

AAPG supports a code of ethics for professional geologists to assure employers and clients of the integrity of its members.

The Association is guided by officers and a House of Delegates elected annually. The organization's programs are administered by an Executive Director and staff located in Tulsa, Oklahoma.
