

EarthComm Earth System Evolution: Climate Change

Preparing a display to educate the community about biological changes in the area sets the stage for the Chapter Challenge. Students learn about the evidence for changing life and the factors that can cause biological changes over time.

Students Will...

- Understand how biological changes are tied to all of the Earth systems.
 - Participate in scientific inquiry and construct logical conclusions based on evidence.
 - Appreciate the value of Earth science information in improving the quality of life, globally and within the community.
-
