

EarthComm Earth's Fluid Spheres: Cryosphere and Your Community

Students are challenged to prepare a report and public information display to explain how advancing and retreating glaciers would affect their community.

Students Will...

- Understand how and why the cryosphere is a part of Earth systems.
 - Participate in scientific inquiry and construct logical conclusions based on evidence.
 - Recognize the global impacts of the advancing or retreating of glaciers.
 - Appreciate the value of Earth science information in improving the quality of lives, globally and within the community.
-
