

## Lily Strelch

Lily Strelch is a Geoscience Policy Intern with the American Geosciences Institute. She graduated in May 2014 with a Bachelor's degree in Geology from Occidental College. As an undergraduate, she volunteered with the National Institute of Archaeology in Bulgaria, and studied environmental policy in Berlin. She earned academic distinction for her senior thesis, written on exhumation and uplift in the Sierra Nevada Mountains, where she attended field camp. Lily's research interests include oceanography, hazard mitigation, unconventional resources, and Arctic geopolitics. She plans to continue promoting the geosciences as a science writer. She is originally from Santa Barbara, California.
