

## Piper Lewis

Piper Lewis received her undergraduate degree in Geosciences from Earlham College. As an undergraduate she worked on the Early Farming in Dalmatia project performing geochemical analysis of early agricultural archeology sites. She also had the honor of assisting in scientific research on the USCGC Healy, a Coast Guard icebreaker in the Arctic Ocean. Before interning at AGI, Piper worked as a geosciences interpreter and podcast developer at Devils Tower National Monument in Wyoming. She enjoys narrating audiobooks and is an aspiring novelist. She is interested in marine and environmental sciences, and hopes to eventually work in science and policy communications.
